# FLASHCARDS

Flashcards are a great way to practice addition, subtraction, multiplication, and division. You can purchase them or make them at home! Simply write the equation on one side and the answer on the other side.

# BOARD GAMES

Board games are a fun way to practice addition, subtraction, multiplication, division, and even fractions. Choose games that involve counting, strategy, or number operations. You can use classic games or make your own! Simply play and talk through the math as you go to build confidence and understanding.

Games to use: Crazy Eights, Uno, Monopoly, Yahtzee, Uno, Sorry!, Connect 4, Math Bingo, Rumikube

# INTERACTIVE WORKSHEETS

Worksheets are a great way to practice math skills and check understanding. You can use themed worksheets like “solve the code,” where students answer problems to reveal a hidden message. These activities make review fun while reinforcing accuracy and confidence.

# PRACTICE WITH MONEY

## (REAL WORLD EXAMPLES)

Money problems are a great way for kids to practice real-world math. Use everyday situations like memberships, discounts, or savings to build problem-solving skills.

**For example**, a Costco membership costs $60. To upgrade to the Executive Membership, you have to spend an extra $60. With the Executive Membership, you earn 2% back on all purchases. How much would you have to spend to make this upgrade worth your while?
Answer: 60 = .02x
x=$3000
